Market leading solutions to  
**cool, heat, ventilate & control**  
the nation's buildings

# Welcome to **Mitsubishi Electric**

Mitsubishi Electric is a market leader in providing solutions to cool, heat, ventilate and control our buildings.

As a major manufacturer of some of these pivotal technologies, we hold the UK's energy challenges close to our heart. We want to help the nation achieve its climate goals; we want to help individuals and businesses reduce the energy consumption of their buildings, whilst also helping to reduce their annual running costs.

At Mitsubishi Electric we are constantly evolving and today our areas of expertise go way beyond the advanced air conditioning systems that formed the foundation of our business. Here in the UK, we provide advanced solutions that cool, heat, ventilate and control buildings in the most energy efficient and cost-effective ways possible. Through technical expertise, experience and an innovative product range, we enable buildings everywhere to significantly improve energy efficiency, reduce running costs and adhere to increasingly tough legislation.

We also provide a variety of additional services and benefits to our customers which include:

- **Product training and technical support**
- **Contractor Partner Programme**
- **CPD guides and presentations**
- **Design and consultancy services**
- **Apps and tools**

## Working towards a better use of energy in buildings

Mitsubishi Electric's global framework for realising a sustainable planet - **Environmental Sustainability Vision 2050** - is translated in the UK into our **Green Gateway philosophy**, which is central to the way we do business. With this initiative, we are seeking to use our position as a manufacturer of key technologies to increase awareness and improve energy use in the built environment.

By constantly challenging everyone involved to combat the issues we all face and encouraging constructive dialogue throughout the industry, we aim to help everyone address their energy use and to work towards a more sustainable future. Working within the construction industry in this way we are continually developing energy efficient cooling, heating and ventilation solutions - all managed by the most advanced control systems available.

# New Products for 2023

## M Series

### **MSZ-AY R32 Elegance Wall Mounted System**

The new MSZ-AY models offer some great new features and benefits, enhancing the Elegance range's ability to deliver stylish design, excellent flexibility and energy efficiency.

---

## Mr Slim

### **PEA-M-LA2 R32 Large Capacity Ceiling Concealed Ducted Systems**

19kW and 22kW ducted units, compatible with both Power Inverter and Standard Inverter outdoor units; available utilising R32 refrigerant.

### **SFZ-M R32 Floor Mounted System**

A compact concealed unit providing simple, effective air conditioning for perimeter zones in offices, restaurants and retail premises; available utilising R32 refrigerant.

---

## Commercial Heat Pumps & Chillers

### **CAHV-R R454C Air Source Heat Pump**

Air source heat pump utilising low GWP R454C refrigerant, and offering a robust, low carbon system for the provision of sanitary hot water and space heating.

### **MEHP-iS-G07 / MECH-iS-G07 Modular Heat Pump & Chiller**

R32 modular systems, available in either cooling only or heat pump versions from 50 to 880kW.

### **EW-HT R134a Water to Water Heat Pump**

The Climaveneta EW-HT is perfect for applications where very high temperature water is needed.

## IT Cooling

### **x-MEXT DX Close Control System**

New computer room air conditioner (CRAC), incorporating a wide range of options and configurations, and manufactured to the highest Mitsubishi Electric quality and reliability standards; available from 27.7 to 132kW.

### **w-MEXT Chilled Water Close Control System**

Chilled water range that brings high efficiency and high SHR performance to smaller data centre and server room environments.

### **RCWall Data Centre Fan Wall**

When scale is required, RCWall brings the performance, flexibility and reliability that is needed. It is ideal for hyperscale datacentres and large co-location customers.

---

## Refrigeration

### **ECOV Series R744 Natural Refrigerant Condensing Unit**

The Mitsubishi Electric ECOV Series is ideally suited for convenience stores, cold storage rooms and cold chain distribution centres, and delivers reliability and energy efficiency through its use of proven Mitsubishi Electric technology.

---

## Ventilation

### **LGH-RVX3-E Commercial Lossnay System**

Fresh air ventilation with energy efficient heat recovery, perfect for commercial environments.

### **WizardX-G07 E-OU Air Handling Unit**

The Climaveneta WizardX Air Handling Units utilise a combination of Mr Slim R32 Power Inverter heat pump technology, efficient thermal wheel heat recovery technology and an integrated controls system.

---

## Residential Heating

### **Versatile Cylinders for Ecodan Monobloc Units**

The new Versatile Cylinders (Slimline and Standard versions) come ready to plumb into the system, and contain a range of advanced controls.

---

## Controls

### **MELCloud Commercial**

MELCloud Commercial allows remote management and monitoring/control of HVAC systems in multiple buildings from one central location, and by multiple users.

One CMB-WM-V-AA unit can be used on PURY-(EM)300-350YNW-A1 and PQRY-P300-350YLM-A1 units with a system efficiency reduction. Two CMB-WM-V-AA units can be used in parallel on PURY-(EM)300-500YNW-A1 and PQRY-P300-500YLM-A1 outdoor/condenser units. PURY-(EM)400-500YNW-A1 requires two CMB-WM-V-AA units. One CMB-WM-F-AA can only be used on PURY-(EM)200-500YNW-A1 outdoor units. A CMB-WM-V-AA and a CMB-WM-F-AA cannot be connected to the same R32 outdoor unit. CMB-WM-V-BB units are for use with PURY-(EM)200-500YNW-A1, PQRY-P200-500YLM-A1 outdoor/condenser units and HVRF indoor units only, when accompanied by a CMB-WM-V-AA or CMB-WM-F-AA unit. ## Advanced, reliable technical support at every step of the way

Meeting today's energy challenges for our commercial premises demands more integrated thinking from everyone involved in the design, supply, installation, commissioning and maintenance of essential building services - whether it is for an individual property or a national estate.

Ever increasing energy bills, the need to reduce carbon emissions and a raft of challenging legislation are driving the demand for increased energy efficiency and control in the cooling, heating, ventilation and associated technologies that we use.

As a manufacturer, we realise that product development alone is not enough.

To keep our products working at their optimum, we have developed the **MELSmart** approach to ensure our customers are able to maximise the energy efficiency of their building's services right from the start.

## Fault Finding

Our Fault Finding service is carried out on new and existing installations to identify problems and offer resolutions to ensure the system is returned to a fully operational condition in the shortest possible timeframe.

Our Fault Finding service is available across our entire product range.

During the Fault Finding process our engineers will carry out assessments of the following to determine a resolution:

- **System design, application and specification**
- **Standard of installation**
- **Operational performance of equipment**
- **Current and historic fault codes**

Product	Detail	Price (£)
<b>Air Conditioning</b>	One day per reported fault	<b>750</b> per day
<b>Controls</b>	One day per reported fault	<b>750</b> per day
<b>Hybrid VRF</b>	One day per reported fault	<b>750</b> per day
<b>e-Series Chillers</b>	One day per reported fault	<b>750</b> per day
<b>Commercial Heating</b>	One day per reported fault	<b>750</b> per day

**Notes:**

Whilst our engineers will carry out a thorough assessment of the system and provide recommendations to rectify any issues, they do not carry spare parts and cannot provide a same day resolution in the event of part failure. If equipment failure due to manufacturing is discovered no cost will be raised and the visit will be carried out F.O.C. It is the responsibility of the customer to provide access to all of the affected equipment on site. Whilst our engineer will identify any installation and setup issues that are affecting performance it is the responsibility of the contractor to rectify any problems.

## Commissioning

Our assisted commissioning service is aimed at both new and existing customers; the objective is to demonstrate how to commission our systems effectively, so that customers can carry out these tasks unassisted in the future.

Our commissioning service is available across the full product range including: **Air Conditioning, Controls, Hybrid VRF, e-Series Chillers and Commercial Heating products.**

During the commissioning process, our engineers will carry out the following tasks:

- **Comprehensive inspection of the installed system to ensure the system meets Mitsubishi Electric specification**
- **Check the system addressing and advise on any incorrect settings**
- **For systems other than controls we will operate in both cooling and heating modes where applicable and record temperatures, pressures and water flow rates for the system**
- **Supervise the completion of commissioning logbooks**

Type of Commissioning	Detail	Price (£)
<b>Air Conditioning</b>	Max 3 City Multi systems per day	750 per day
<b>Controls</b>	1 x AE-200 and up to 4 x EW-50E per day	750 per day
<b>Hybrid VRF</b>	½ day pre installation visit	<b>Inclusive</b>
<b>(FOC first installation)</b>	½ day mid installation visit	<b>Inclusive</b>
	2 day commissioning visit	<b>1,500</b>
<b>e-series Chillers</b>	Max 4 chillers per day	750 per day
<b>Commercial Heating</b>	Max 3 units per day*	750 per day

### Notes:

Whilst our engineer will supervise the successful completion of all tasks and address any questions or skill gaps that present themselves it is the responsibility of the installing contractor under supervision to carry out all of the listed tasks. Whilst our engineer will supervise the successful completion of the commissioning logbooks it is the responsibility of the customer to complete and submit the commissioning logbooks to MEU-UK unless specified.

\*Transit bolts must be removed before we arrive on site. If transit bolts are not removed additional time and cost may be incurred.

Control System	Commissioning Days	Commissioning Cost	Charge Pin Code	Charge Pin Cost	BACnet Pin Code	BACnet Pin Cost
1 x AE-200 + 1-4 EW-50E	1 day	750	1-5	584	1-5	1,239
2 x AE-200 + 1-4 EW-50E	2 days	1,500	1-10	1,168	1-10	2,478
3 x AE-200 + 1-4 EW-50E	3 days	2,250	1-15	1,752	1-15	3,717
4 x AE-200 + 1-4 EW-50E	4 days	3,000	1-20	2,336	1-20	4,956
5 x AE-200 + 1-4 EW-50E	5 days	3,750	1-25	2,920	1-25	6,195

### Additional commissioning costs per AE-200 + 1-4 EW-50E control system

If charge / apportioning is required then add 1 pin code per AE-200 control system; however the customer will pay £1,500 for 2 additional commissioning days.

If BACnet is required add 1 pin code per AE-200 control system; however the customer will pay £750 for 1 additional commissioning day.

## Health Checks

Our Health Check service is carried out on existing installations to ensure that the system is operating within our design parameters. The service is available to both new and existing customers and the objective is to establish a fully operational system.

Our Health Check service is available for the following product ranges:

**Air Conditioning including Hybrid VRF, e-Series Chillers and Commercial Heating products.**

During the Health Check process, our engineers will carry out the following tasks:

- **Comprehensive visual inspection of the installed system to ensure the system meets Mitsubishi Electric specification**
- **Check the system addressing and advise on any incorrect settings**
- **Full operation in both cooling and heating modes where applicable**
- **Record operating data including temperatures, pressures and water flow rates of outdoor units, BC boxes and indoor units to determine the correct operation**

Product	Detail	Price (£)
<b>Air Conditioning</b>	Up to 3 systems per day	<b>750</b> per day
<b>Hybrid VRF</b>	Up to 2 systems per day	<b>750</b> per day
<b>e-Series Chillers</b>	Up to 4 systems per day	<b>750</b> per day
<b>Commercial Heating</b>	Up to 3 systems per day	<b>750</b> per day

### Notes:

Whilst our engineer will ensure the successful completion of all tasks and address any questions or skill gaps that present themselves it is the responsibility of the contractor to provide access to all equipment. Whilst our engineer will identify any installation and setup issues that are affecting performance it is the responsibility of the contractor to rectify any problems.

## Product Training

Mitsubishi Electric provide specific, in-depth training at our state-of-the-art training centres across the UK, or via our award-winning online training, covering all aspects of installation, from design through to maintenance. Our courses are taught by experienced engineers, with a wealth of knowledge and are all CPD accredited.
